How It Works

Post Requirement

Provide required details to create a rich project. Seek our help if required

Evaluate Bids

Make your selection basis the technical & commercial aspects of the bids received

Select Vendor

Finalize project after connecting with selected vendor. Change if required

Begin Work

Your advance payment is passed to supplier only basis your approvals

	Freelancer	Agency	
Quality	**	***	Too many freelancers; finding good quality is a challenge. Agencies have a pool of talent & are rated by renowned independent bodies
Reliability	*	***	An Agency is a business house which mitigates risks associated with a single individual who may disappear miss deadlines or perform sub-optimally
Cost	***	***	In-demand freelancers charge higher rates ; while others may sometimes charge lower rates than agencies
Complex Projects	**	***	Projects which are of longer duration or which require more than one resource or skills are better done through agencies
Post-Project Support	*	***	Agencies have processes and teams for escalations & support which individual freelancers may not be able/available to provide

### Save time, money & energy by hiring a Flexi Talent instead of a permanent employee!

☒ Experienced talent pool - Many agencies already have the skilled people who can add value to your work

☒ No permanent hire required - After completion of work person will go back to parent agency

Type of flexi talent

☐ Full time

The resource will be working full time with you, either from your office or remotely. You will be billed basis monthly/ weekly rates basis the duration of engagement. Please do note that availability of resources is higher for remote working (i.e. agency's office) and for longer duration contracts.

☐ Part time

These resources can be utilised for short term projects or long term retainerships. Just choose the duration of engagement and the approximate hours that you wish to engage them for.
